

Risk Assessment

Risk Assessment and Classifications Matrix

The Contractor is to include a document entitled Risk Assessment Plan. This document is to identify all the risks and safety measures that the Contractor will be employing during his work on Trust premises and will identify any specific safety work that needs to be undertaken. This document will also identify contingency measures being made by the Contractor, in the event of any emergency which arises directly as a result of the work which he is undertaking. These contingency measures shall include accidental spillage, releases into the atmosphere and releases into any water or drainage system. This document shall also identify the name of the Safety Officer within the Contractor's organization, who may be contacted by the Trust in the event of safety enquires relating to the work being undertaken. The Trust risk matrix is shown below:
