SCI Rehabilitation: Considerations for Occupational Therapists and Physiotherapists

Wednesday 8th May & Thursday 9th May 2019

This course is aimed at:

- OTs and PTs who work in both the acute and rehabilitation settings who are keen to learn more about treating patients with a spinal cord injury (SCI).

Practical Workshops and Lectures covering:

- ASIA (ISCNSCI) and what it means for functional outcomes
- Management of CVS
- Bladder, bowel and skin considerations
- Bed mobility and transfers
- Posture and seating options
- UL management
- Interactive case study discussions
- Spinal charities

The course will take place at the Stanford Room, Aspire Building, Royal National Orthopaedic Hospital (RNOH), Stanmore HA7 4LP

A cost of £250 for both days (with lunch included)

There are limited places available so please contact Karen Rawlins if you are interested.
