

# Welcome to the Royal National Orthopaedic Hospital

The mentorship program

# What is Mentorship?

- I am a link between you and the university as a removed person away from your clinical educator
- I'm also that alternative person on your assessment forms if you do not want to talk to another team member

- 
- Who are you?

# What are we planning on doing over the next 5 weeks?

- There will be three sessions:
  - Introduction to RNOH
  - Discussion about challenging patients
  - Feedback and interview questions or discussion about communication difficulties
  - Coping and resilience
  - Meet the research physiotherapist
- Option of 1:1 sessions if you need to speak to anyone other than your educator

# What to expect from the placement?

- What have you heard about Stanmore?
- Specialist centre
- May not have a ward on your own or a full patient case load
- May have your clinical educator with you more than you have before
- There may be a lot more teaching and own reading

# Feedback

- Feedback comes in all forms so look out for it!
  - Discussion during patient treatment
  - Discussion pre or post patient treatment
  - Sit down recorded discussions
- Always ask for constructive feedback and do not take constructive feedback personally, we are here to make you the best clinicians!

feedback

# What can you do?

- Read the pre-placement information
- Read your assessment form – be familiar with what is expected at each level
- Need to think outside the box, if an area has set outcome measures that they use can you research other options?
- Feedback to your educator – if something is not working let them know, everyone works differently

# What can you do?

- Complete the peer review forms – great for interviews!
- Complete the feedback forms, this is how we get better.
- Don't forget to nominate your CE for the educators awards if they are super good!!

# • Any Questions?

- What do you want to do in the next few weeks?
